

Institute for Methods Innovation

Research | Evaluation | Engagement | Training

Ireland | United States of America | Estonia

Company overview

We help you use research, evaluation, and social science methods to make better decisions and improve outcomes for your target audiences.

IMI is a nonprofit organization working internationally to advance the use of evidence in real-world decision-making. We specialize in practical research and evaluation methods that support learning, strategy, and impact across various fields, including policy, education, science communication, and public engagement.

Through expert-led training, collaborative research, and tailored support, we help our partners apply evidence to design more effective programs, engage communities, and assess what works. Our team brings deep expertise in social science, participatory methods, and evaluation, helping others build their own capacity to use evidence with confidence.

A trusted partner for organizations across research, policy, and practice

At a global level, we provide research and evaluation expertise to national funders such as Research, The Wellcome Trust, Research Councils UK, the European Commission, Disney Conservation Fund, Arts Council England, the World Association of Zoos and Aquariums, and the European Space Agency. Clients include governmental bodies, numerous leading civic science and informal learning institutions, and leading higher education institutions.

Our expertise

Research

- Research design
- Applied social science methods
- Stakeholder research
- Data management

Impact

- Impact planning and evaluation
- Theory of change
- Evidence synthesis
- Ethical research impact

Public engagement

- Public engagement
- Participatory methods
- Policy engagement
- Science communication

Training and support

- Training and capacity-building
- Grant writing
- Learning Management Systems
- Educational content development

Our team

We're researchers and practitioners with a shared commitment to evidence-based methods.
